Height: 27 mm

Check your spindle height!
The spindle height with applied record shall not exceed 10,5mm!

Record Puck S

This new record puck ensures a secure fit between record and turntable. With the two different finishes, black painted and polished aluminium, it perfectly fits the design of of our turntables.

Record pucks use weight to secure a playing vinyl record against the turntable platter. By holding the two together, the sound performance of the turntable will improve, in timing and depth of sound.

With a weight of 315 grams, this puck is also perfect for smaller turntables in order not to burden the turntable bearing and to prevent an increase in rumbling.
